

# Superreel® - Industrial Reel

## Retractable cord reel

A retractable cord reel automatically winds up a cord and stores it safely for you.

Self-retracting cord reels have a spring mechanism that automatically winds the cord back on the reel, making them easier to use than hand-winding cord reels. A stop, or ratchet, holds the cord at the desired length after it's pulled out for use. A quick tug on the cord disengages the stop, causing the spring to fully retract the cord. These reels provide access and storage of extension cords while protecting the cord from wear, tangling, and kinking.

Retractable cord reels are commonly used in retail, commercial, and manufacturing applications, including pressure washing, landscaping and ground maintenance, and service garages.

## OUR CAPABILITIES

- Ultra-high pressure and high current, the highest pressure of gas and liquid up to 80-100MPA. Taking advantage of the National New Energy Policy, the maximum current of the DC charging reel can reach to 500A.
- Super-long. Spring-driven reels can handle hoses or cables up to 50 meters. Motor-driven reels' capacity up to 3000 meters.
- Engineering reciprocation. One of the few domestic manufacturers that can produce reciprocating hose reels and multi-line hydraulic reels.
- Smart reels with intelligent functions. Limit, feedback, measurement, remote control, APP control, adaptive control and other functions are used in our reels.

# Superreel® - Industrial Reel

- Hose and cable combined reels. One reel can manage/ transmit media including acousto-optic signals, various gas-liquid media, etc, at the same time.
